# CONDOMINIUM CORPORATIONS IN OTTAWA-CARLETON

# JULY 1991 LIST

This is a list of the 553 condominium corporations in Ottawa-Carleton that have been created by June 1991 (the first was created in 1969). These corporations are created under provincial legislation which calls for them to be run by a board of directors elected by the owners of the constituent units. For the most part, these units are residential - though increasing numbers of newer ones are commercial, industrial, office condominiums, or some combination. And for most of the residential condominiums, the owners are also residents of the units, although some operate as rental housing with the units owned by investors.

In condominiums, each owner has exclusive ownership of his or her unit (from the inside of each exterior wall) but shares in the ownership of the "common elements", such as parking lots, recreation areas, and of course the basic building structure. Each owner must pay monthly fees to the corporation which are used to pay for water service (units do not have individual meters), snow clearance and landscaping, building insurance and upkeep, and costs associated with the management.

Condominiums, although functioning primarily as property managers, also play the role of a property owners' association, concerned with issues similar to those of any neighbourhood-based or merchants association. It was in an attempt to reach these associations that the Planning Department of the Regional Municipality first started this list in 1985.

The list provides the most useful information on each corporation:

**Number**

The number for each condominium in Ontario is established sequentially by county. *This list is organized by this number.* Ottawa-Carleton has condominiums in two counties, Carleton and Russell (land registry records in Ontario retain this historical anachronism). All but 17 are "Carleton County Condominiums" or CCCs, for short; the condominiums in the Township of Cumberland are known as RCCs or Russell County Condominiums, since Cumberland was originally part of the County of Russell. The latter are found at the end of the list in the thousand-series, e.g., #1009 is RCC9.

**Popular Name**

Most condominiums have a name by which the units were marketed by the builder. This usually becomes better known than the condo's number. *Note the Popular Name Index (List C).* Some popular names are the condominium's street address, e.g. "400 Laurier"; these are at the top of the list in numerical order by the first digit. If the popular name of a condominium does not appear in the list, please let us know about it.

**Mailing Address**

This is the mailing address of the corporation, not necessarily the address of the condominium. Very often this address is that of the management company - for those condominiums that have chosen to hire one - who passes information on to the board of directors. The address is used to mail the Planning Department's newsletter, *in process*, almost every month by first class mail. When mail is returned by the post office, the correct address is found and changed accordingly.

**Management**

This field is reserved for the identity of the manager of the condominium. If it is "self-managed", this field is usually left empty. For most, the manager is a management company. *Note the Index by Management Company (List A).*

**Phone**

This is always a workday phone number.

**Construction Information:**

The ***number of units*** distinguishes between row units vs. apartment units. If both amounts are zero, the condominium is a non-residential (industrial or commercial or office) condominium. The ***date of construction*** is the year (or in later years the year and month (YYMM) when the condominum was registered, usually some months after construction (or in the case of the condominium being a conversion from a rental project, some year after). The ***builder*** is identified by usualy one key word. Sometimes the builder is a numbered company or a one-project-only subsidiary of a larger company.

**GCode**

This is a reference to the municipality and, for the larger municipalities, the ward within the municipality. See table on next page. *Note the Index by Geographical Code (List A).*

**Nearest Intersection**

This is a more specific reference to the location of the condominium than GCode. Where the street name is used in the popular name, the reference here will be only to the intersecting street (e.g. If the title is "Greenbank

Court" and is on Greenbank Road, the reference here would be, "at Baseline").

**Update**

We include an UPDATE field that refers to the latest date (YYMMDD format) we confirmed the information. When the DD section is missing, it refers to the fact that we used a secondary source to confirm the information.

## *G-CODES*

# INDEX BY POPULAR NAME

**(NOTE: Not all condominiums have what we call popular names (names created usually in the marketing of the units). Those lacking them may be non-residential, or primarily rental residential, or we have not been able to determine them. This list should be useful to those who do not refer to condominiums other than by this name rather than its number. Some names are preceded by "The", found in the T's alphabetically.**
